Notes:

Data based on manual reads by TEAM of the Hay Ranch North and South Well Totalizers.

Hay Ranch Project groundwater pumping was initiated on 12/25/09.

The HRS A Totalizer, measuring groundwater pumped from Hay Ranch South Well, was discontinued on May 12, 2010 and subsequently uninstalled.

As of May 12, 2010 groundwater pumped from Hay Ranch South Well is flowing into the permanent Hay Ranch Water Tank and is measured by the HRS B Totalizer.

The Hay Ranch North Well is the reserve production well and groundwater pumped from this well is measured at the HRN C Totalizer.
