

Table 2. Depth-to-water at Indicator wells, April 2023. All data are in feet from reference point on the test well. Negative values denote a decline in water level. Average values by wellfield are shown in orange text. Baseline at monitoring sites is the April average of water levels from years 1985-87. Baseline was predicted from monitoring site/Indicator wells regression models if the test well was not present from 1985-87.
